Portfolio

Summary

B.Tech Computer Science Engineering student (AI & ML) with a solid understanding of C++, Java, Python, and Data Structures & Algorithms. Skilled in developing web-based and full-stack applications using modern technologies. Strong problem-solving and logical thinking abilities with a focus on software development and building practical technology solutions.

Education

Galgotias University, Greater Noida

August 2024 – Present

B.Tech in Computer Science Engineering (AI & ML)

CGPA: 8.56

Kendriya Vidyalaya Danapur Cantt

Class XII, Senior Secondary

April 2023 – March 2024 Percentage: 87.4%

Class X, Secondary (CBSE)

April 2021 – March 2022 Percentage: 87.4%

Skills

- **Programming Languages:** C++, Java, Python, C
- **Web Technologies:** HTML, CSS, JavaScript, React
- **Backend Technologies:** Node.js, Express.js, Socket.IO
- **Database & Tools:** MongoDB, MySQL, Git, GitHub, VS Code
- **Core Areas:** Data Structures & Algorithms, OOP Concepts, DBMS
- **Soft Skills:** Teamwork, Logical Thinking, Problem-Solving

Projects

EDUNA – Virtual Campus Platform

August 2026 – September 2026

(React, Node.js, Express.js, MongoDB, Socket.IO)

- Developed the coding backend to handle problem retrieval, code submissions, and submission result management for the platform
- Integrated Judge0 for remote code execution, enabling users to submit solutions and receive execution results programmatically
- Built leaderboard backend functionality to track coding performance, calculate scores, and rank users based on their submissions
- Designed and implemented REST APIs for coding, submission, and leaderboard modules, integrating MongoDB/Mongoose models and coordinating data contracts with the database layer

Carbon Footprint Calculator (*HTML, CSS, JavaScript*)

January 2026 – February 2026

- Built an interactive web application to estimate weekly CO₂ emissions based on driving, electricity consumption, flights, and diet
- Implemented JavaScript-based emission calculations and visualized category-wise results using bar, pie, and line charts with Chart.js
- Developed personalized recommendations based on user inputs to help identify major emission sources and reduce their carbon footprint

Certificates

- Database Programming with SQL – Oracle Academy Certification Nov 2025
- Design Thinking – A Primer – NPTEL (IIT Madras) Elite Certification Aug 2025
- Object-Oriented Programming – Guvi HCL Certification May 2025

Achievements

- Solved 600+ coding problems across competitive programming and Data Structures & Algorithms challenges
